Art Unit: 1754

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawasaki et al in view of either Pappis et al or Ishii et al, for the reasons given in the last Office Action. Applicants' argument, that Kawasaki et al clearly state in col. 8, lines 39-41 that firing at less than 1700^o C causes the hBN to have low crystallinity whereas, by contrast, the present invention utilizes two heating steps with the first being to uniformly heat the reaction mixture and maintain at or below 1000^o C, is not convincing, since the heating step at 800^o C disclosed at col. 13, lines 1-4 of Kawasaki et al would constitute a preheat step. Applicants' argument, that Kawasaki et al is incompatible with either Pappis et al or Ishii et al, is not convincing, since prior art references may be relied upon not only for what they specifically teach or disclose, but also for what they would collectively suggest to one of ordinary skill in the art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
